Phones: +55 11 94587-4512
E-mail: augustosumac@gmail.com

Objective

Development and maintenance of web systems (Full Stack Senior) PHP / JS / SQL / DevOps.

Education

System Analysis and Development
Institution: PUC-MG.
Ongoing - 1st semester

Computer Science
Institution: USCS – Universidade Municipal de São Caetano do Sul.
Course Suspended – 2 Semesters

Extracurricular Courses

DevOps Training
Institution: Udemy.
80h – Completed in 2022

AEM Essentials I Training
Institution: Adobe
20h – Completed in 2022

Web Development with PHP / Web Development with PHP/Security with PHP – Object-Oriented
Institution: 4linux – Free Software Solutions.
120h – Completed in 2014

XHTML-CSS – Tableless
Institution: Impacta Certification and Training.
80h – Completed in 2013

Skills

Frontend: HTML5, CSS3, Sass, jQuery, JavaScript, Ajax, VueJs, Npm.
Backend: PHP, SQL, Mysql, PostgreSQL, Laravel, Yii, Lumen, CakePHP, CS-Cart, Wordpress, Wordpress Multisite, Woocommerce, Joomla, Adobe AEM.
Version Control: Git, Github, Gitlab, and BitBucket.
Design: MVC, Solid, Repository.
Infrastructure: Linux and Windows Server administration, Apache, Nginx, EC2, Route 53, ISPConfig, Whm/Cpanel, GCP, Azure, Digital Ocean.
Deploy/CD-CI: Jenkins, Docker, Docker Compose, AWS.

Languages

Basic English.

Reading documentation and libraries, writing, and reading emails.

Professional Experience

Senior Full Stack Developer – Objective (04/2024 – Present)

Development and maintenance of web platforms and APIs, payment integration, working with the client Ebanx in the finance visibility area, handling PHP, APIs, and SQL for financial transactions for clients such as Google, TikTokADS, Uber, among others.

Senior Full Stack Developer – Phixies (08/2023 – 04/2024)

Development and maintenance of web platforms and APIs, payment integrations, Sefaz integrations, and PlugNotas integration using Laravel 9, VueJs, Quasar, and Digital Ocean as infrastructure, currently providing freelance services based on demand.

Senior Full Stack Developer – Cogna Educação (02/2023 – 06/2023)

WordPress Themes and Plugins Development:

- Creation of custom themes for WordPress, following best practices and guidelines.
- Implementation of advanced functionalities using PHP, HTML, CSS, and JavaScript.
- Performance optimization and security of developed themes and plugins.

Infrastructure and Development Environments:

- Active participation in creating and configuring development infrastructure using tools like Docker, Docker Compose, GitLab, and Kubernetes.
- Implementation of development, testing, and production environments to ensure a continuous development and deployment flow.
- Configuration and maintenance of servers and services on AWS (Amazon Web Services) for hosting and scalability.
- Implementation of CI/CD pipelines using tools like GitLab CI/CD or other automation solutions.
- Continuous deployment of updates and releases using CD/CI practices, ensuring an efficient and reliable delivery process.

Collaboration and Technical Leadership:

- Teamwork with other developers and collaborators, actively participating in meetings, discussions, and project planning.
- Guidance and technical support to team members, helping them develop their skills and solving complex problems.

Senior Full Stack Developer – Gauge (02/2021 – 12/2022)

- Management of WordPress multisite network (1200 franchises), ensuring platform stability and efficiency.
- Creation and customization of themes, plugins, and functionalities for the WordPress CMS, meeting the client's specific needs.
- Implementation of security measures and site protection, ensuring data integrity and user privacy.
- Collaboration with the client's infrastructure team in creating and automating deployment and backup pipelines, streamlining development and maintenance processes.

Development and Maintenance for Client Pearson (Inova):

- Contribution to the development and maintenance of application features using the Yii framework.
- Participation in problem resolution activities, bug fixes, and application performance improvement.

Development and Maintenance for Client IAS (Instituto Ayrton Senna):

- Creation and maintenance of pages using the Adobe AEM (Adobe Experience Manager) CMS.
- Application deployment via AWS (Amazon Web Services), ensuring system availability and scalability.

Maintenance for Client Stefanini Rafael:

- Maintenance of pages via the Adobe AEM CMS, ensuring the correct display of content and functionalities.
- Application deployment using the designated cloud service.

Maintenance for Client Topaz Banking:

- Maintenance and deployment of the CMS Strapi, using the React library for developing system interfaces and interactions.

Development of the New Sesc Website Project:

- Creation of the theme, plugins, and production environment using the WordPress CMS in conjunction with the Microsoft Azure platform.
- Implementation of advanced features and customizations to meet project needs.

Methodology:

- Work based on the Scrum methodology, using task checklists, daily meetings (daily), planning (plannings), and reviews (reviews).
- Collaboration in multidisciplinary teams, maintaining effective and agile communication to meet project goals.

Mid-Level Full Stack Developer – Municipal University of São Caetano do Sul (02/2020 – 08/2020)

- Migration of the college's legacy platform to a new system structure using Laravel 6, query optimization, front-end adjustments with Bootstrap, Ajax, and jQuery, API creation for sending information from the managers and teachers section, and its documentation.

Mid-Level Full Stack Developer – Mercado Serviços (04/2018 – 12/2019)

- Development of the company's website and service management system using PHP, implementation of AWS resources (RDS, S3, Ec2, and Route 53), payment gateway integration, and application database administration (Infrastructure) and data modeling.

Mid-Level Full Stack Developer – Delos Sistemas (02/2018 – 04/2018)

- Development and maintenance of project management systems in PHP using the Laravel Framework, assisting in front-end development tasks with Bootstrap, Blade Templates, Sass, Gulp, JavaScript, and jQuery.

Consultant/Senior Developer - MEI (10/2016 – Present)

- Owner and Developer at Augusto César Sumac - MEI, working as a consultant in web systems, service provider, and executing freelance projects for individuals and companies, working with hour allocation and strategic IT resources.

Mid-Level Developer – HMBrokers Real Estate and Developments (09/2015 – 10/2016)

- Development and maintenance of the company's website and management system.
- Application database administration (Infrastructure) and data modeling.

Technical Analyst CRM/ERP – Eslo IT - Oracle Partner (02/2015 – 08/2015)

- Implementation and customization of Oracle Cloud applications and integrations with SOAP and REST web services.
- Creation of proof of concept (POC) for approval of future projects.
- Maintenance of the company's website developed in WordPress.

Mid-Level IT Analyst – Asasul IT Solutions (07/2013 – 12/2014)

- Management of support tickets and SLA monitoring, data link and TEF monitoring, creation of BEC documentation, Domain User Management.
